

User manual

Electrical consumption meter visualization

01/10/2020

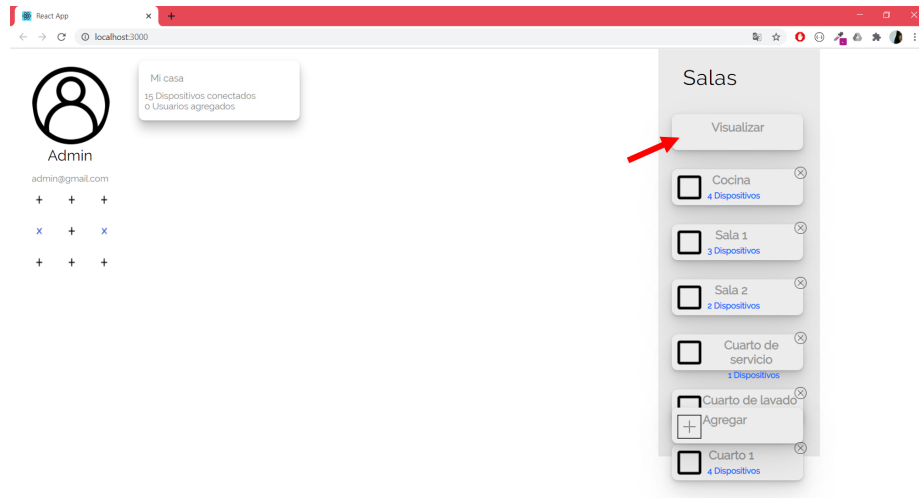

Figure 1: Entering the visualization section.

1 Introduction

This manual describes how to use the visualization section of the Electrical Consumption Meter project. For information about the usage of other parts of the system, consult previous documentation.

2 Entering the visualization section

To enter the visualization section, navigate to the URL of the system, then click the “Visualize” button. This step is demonstrated in Figure 1.

3 Selecting a time frame

When the visualization is first entered, the data for the current month will be displayed. To change the month being visualized click the date picker. This action is demonstrated in Figure 2.

A modal will pop up, the year and the month can be selected. After a selection is made, click “Ok”, to cancel click “Cancel”. A preview of this step is shown in Figure 3. The chart will now displayed the newly selected month.
